Critical Information Summary

Smartlife Vision G.fast Personal Broadband Plans – Updated 20th January 2026

Requirements & Availability

Your Vision VDSL2/G.fast Broadband service comes with the following line speeds which is capable of the following download and upload speeds:

- Up to 500/100 Mbps using G.Fast (minimum attainable sync speed of 250/50 Mbps)
- Up to 1000/100 Mbps using G.Fast (minimum attainable sync speed of 250/50 Mbps)

The availability of these line speeds dependent on your premises' address and the Vision Network node. For G.Fast over FTTN, speeds can only be confirmed once the service has been completely provisioned and activated, as they depend on maximum sync rate of the physical infrastructure that is specific to your premises. For more details please you can visit

<https://visionnetwork.com.au/find-a-provider/>

The download and upload speeds stated are the maximum that each type of Vision Network can deliver and will rarely be achieved by any user for a variety of reasons such as (e.g. how many concurrent users are active, your in-home set-up, including end user equipment and wiring). Infinite Networks makes no guarantee on the actual speeds that will be delivered as we rely on the infrastructure provider to ensure that the service is provisioned to deliver the most optimum speeds at all times.

Connection Types:

1. For Houses (Single Dwellings):
 - If using G.Fast technology, your service connects to the Ethernet LAN port of the Network Termination Unit (NTU) provided by Vision Network.
2. For Apartments or Shared Buildings (Multi-Dwelling Units):
 - If using G.Fast technology, your service connects to the Ethernet LAN port of the NTU. The wiring from the MDF to your socket is managed by the building owner or body corporate.

Equipment:

- For G.Fast services, a Zyxel GM4100 modem is included. You will need a router to share the connection with multiple devices, which can be purchased from Infinite Networks.

Additional Fees and Charges

The following charges may be charged to you for the following reasons:

Description	Charge inc GST
Incorrect Call Out Fee: If a customer incorrectly requests Infinite Networks to arrange for a technician to visit premises, or remotely diagnose a service, where no fault or issue is found or the issue found is beyond the network boundary point (such as private equipment).	\$137.50
Missed Appointment: A Missed Appointment Fee applies when a customer does not attend or is unavailable for a scheduled appointment. This fee will also apply if the appointment is rescheduled with less than 24 hours' notice.	\$137.50
Fault Rectification Fee: A Fault Rectification Fee applies when a technician resolves an issue located within the customer's premises, beyond the network boundary. This includes activities such as repairing or replacing internal cabling, wall sockets, or modem connections, performing a factory reset, reconfiguring the modem, or replacing customer equipment.	\$165.00 for the first hour and then \$30.00 per 15 minute increments
